

Canadians have been counted! Make it count for you.

Customize the new 2006 Census data from Statistics Canada to your catchment areas

Use the Environics Analytics proprietary system to:

- identify areas of new growth
- understand existing catchment areas
- select sites

Environics Analytics is Canada's most experienced team of geodemographic experts.

Data include population, dwellings, density and comparisons to 2001 Census. Custom outputs include reports, maps and data files.
